

B1-DV30: DIGITAL VISION FEATURES

IMPROVING ACCURACY

Yellow tinted lenses preserve color recognition while improving your percentage of depth perception and contrast.

HIGHER PROTECTION

DV30 lenses provide protection against UV Radiation up to 400nm. The UV absorbing lenses protect eyes from harmful neon and halogen light.

LESS FATIGUE

High definition lenses block out 65% of blue light. This will reduce the sharpness of objects which cause eye fatigue, tired, or sore eyes, that can lead to headaches.

GREATER COMFORT

Anti-reflection coating decreases computer glare and overhead fluorescent glare

RECOMMENDED FOR OFFICE

Artificial light in an office environment quickly leads to eye fatigue, and working on the computer puts a strain on the eyes. It's particularly important to use anti-reflective coatings to protect your eyes while working.

RECOMMENDED FOR DRIVING

Enhanced color recognition provides you with improved safety & faster recognition of potential hazards on the road, especially at night. The reflections of street lamps and headlights on your lenses are virtually eliminated.

HIGH DURABILITY

Anti-reflective coatings enhance the quality and extend the lifetime of your lenses by providing superior scratch resistance, durability and resistance to dirt and water.

Meets ANSI Z80.3-2001 and CE EN1836 Standards.
